### THIS CANADA OF OURS

Canada is the fifth trading country of the world, though twenty-seventh in point of population. That fact is one which Canadians will do well to ponder. They cannot do so without a growing appreciation of the splendid heritage to which they have fallen heirs, and a quickening sense of the rich rewards their country has to offer for the application of capital, industry, enterprise and thrift.

Trade is based upon production. We are a great trading nation because we are a great producing nation. Our trade per head is greater than that of other peoples because our production per head is greater. The Canadian worker creates more wealth for a given amount of labor expended than do the workers of other countries. Capital employed in Canada reproduces faster than elsewhere. That is because Canada offers the opportunity to employ labor and capital which will bring larger returns than the same amount of labor and capital employed in another country.

Canadians have never been over-conscious of the material resources of their country, nor of how much they had to offer to the world. The steady stream of our young people pouring across the border into the United States is a phenomenon, and one that happens anywhere else in the world that so large a proportion of the young men and women, generation after generation, would turn their backs upon a homeland so abundantly supplied with the raw materials for success, to seek fortune in another country. Have Canadians been suffering from chronic national "inferiority complex"?

If so, the new year finds them in circumstances which they cannot contemplate without developing a new faith in Canada, a larger confidence in themselves, and a conviction that this is to be the wonder country of the century. From the yields of farm products to bank balances and building returns, the records of the past year are showing the trade statistics that Canada has attained a position of which its people should be proud, and that it is a future which will be brighter than any that has ever been before.

There can be no such matter with a country, its people or its national policy, which has so small a population it ranks so high among the trading nations. The latent wealth of Canada cannot be doubted. If our people have been wanting in self-confidence it is because we have not realized how far we have been accomplishing. And, political theories and preferences aside, the fact that the Dominion is sending its produce into more than one hundred other countries of the place we have established for ourselves in the world of commerce.

It is a privilege to be a Canadian, never more so than at present. We have a record of achievement in which we can justly take pride. The country is enjoying a period of very general and very pronounced prosperity. Capital is flowing in from outside sources. A new railway line is being driven into the mineralized zone of the north. There is a newly awakened interest in mining enterprises, east and west. Our industries are flourishing and our exports are out 38.5 per cent of our total foreign exports. The war debt is being liquidated, and taxation reduced. The period of depression has passed, and confidence in continued progress is in the air.

A considerable area of wild land is brought into cultivation each season. The work is planned for the future and the future is strong. Our timber resources are becoming more valuable as the years pass and foreign supplies diminish. National, provincial and municipal credit is good, and money is plentiful for constructive and improvement undertakings at a lowering rate of interest. The standard of living throughout the country is high, but investment returns and bank reports show that a large amount of the wealth that is being created is accumulating in the hands of a few.

The political importance of the Dominion has been recognized by representation on the Council of the League of Nations. There is no difficulty in inducing immigrants from almost anywhere, rather the difficulty was to limit the undesirable and to regulate the inflow to the rate at which the newcomers can find places in the national economy.

All the signs are that the coming year will be one of successful achievement. By along nearly all lines of production and trade. Given another favorable crop season. It may well be that the end of the year will find the country still retaining its position as fifth among the trading nations of

the world. To even beat that record is possible, though it cannot be reason be expected until there has been a substantial increase in our population and a corresponding expansion of our wealth-producing activities.

### On January Second

By EDGAR E. GUEST

On the second day of January  
The sun shone all day,  
I am very, very, very  
Good as I can be.  
With me you are acquainted  
You will note I was repainted,  
Rehabilitated, and it is true,  
Every bit as good as new.

On the second day of January  
Nothing's wrong with me,  
My smile is bright and merry,  
And I'm happy to be here.  
On all six my engine's hitting,  
If my gears are noisy, filling,  
I don't back-tire and I look  
Like the picture in the book.

On the second day of January  
I don't smoke too much,  
My moods are not contrary  
And I'm happy to be here.  
In my secret service station  
I've had thorough renovation,  
And been cured of habits bad  
Which so many years I've had.

On the second day of January  
I'm a young bird!  
See, I'm not to be wary  
Of my conduct on the third.  
Let not alighting pilot deceive you,  
Like an old cat I must prove you,  
I'm ready to taxi I may stall  
The first hill climb all my haul.

On the second day of January  
I don't smoke too much,  
My moods are not contrary  
And I'm happy to be here.  
In my secret service station  
I've had thorough renovation,  
And been cured of habits bad  
Which so many years I've had.

### Health and Diet Advice

By DR. FRANK MCCOY  
Diet Specialist and Author of "The Fast Way to Health"

Questions on Health and Diet Answered by Dr. McCoy, when addressed to one of the Edmonton Bulletin

THE MEANING OF ACIDITY

It is quite common for patients to believe that their blood is overly acid. They have arrived at this conclusion from hearing so much about acidity, which has gradually come to mean to them that their blood has turned sour. This is a false assumption, as the blood, during life, is never more than slightly alkaline, and a healthy reaction, and death takes place at the very moment when the blood becomes more acid than alkaline.

A small amount of acidity may become dangerous (for instance a crushed finger or toe may have the tissue so destroyed that the bone alkalinity is lost) and the dead tissue may then be so more and then again alkaline. But this cannot be true over any large area of the body, for in life the entire blood stream must be slightly alkaline.

Dr. Frank McCoy When what is called "acidosis" exists it is only "relative acidity." For example, if you add a teaspoonful of baking soda to a glass of water, the water will then possess a definite amount of alkalinity. If even a drop of acid is added to this alkaline water, the alkaline reaction is lowered to just that degree. If drop by drop more acid is added, the water will finally become neutral, and then one drop should be added, the entire amount slightly acid.

In the body a similar phenomenon takes place. Acidity, though wrong habits of living, the amount of "acid" in the blood is really so small that it is hardly noticeable. The blood is then alkaline, but it is really only slightly so.

As the blood alkalinity is reduced, the blood becomes more and more acidic. As the blood alkalinity is reduced, the blood becomes more and more acidic. As the blood alkalinity is reduced, the blood becomes more and more acidic.

As the blood alkalinity is reduced, the blood becomes more and more acidic. As the blood alkalinity is reduced, the blood becomes more and more acidic. As the blood alkalinity is reduced, the blood becomes more and more acidic.

PEOPLE WHO ALWAYS DRIFT ALONG ARE JUST DRIFTING

### How Much Do You Know?

How is your general knowledge? The Bulletin is running ten questions a day. How many can you answer? Test yourself and your friends on the subjects of world, science, history, geography, and general knowledge. You may win 100 per cent in the contest. If you answer eight you rate 80 per cent. If you answer four, you rate 40 per cent. How much do you know?

1. What is "Double Exposure" in law?
2. What two men discovered Typhoid's germ at LASSER, Egypt?
3. Where is the smallest house in the British Isles?
4. Of what large Canadian corporation is A. B. Gaudin president?
5. Name the famous horse that belonged to Alexander the Great?
6. In what country is Monte Carlo?
7. What is said to be the beginning of Canada's recorded history?
8. Who was the author of "The Roggar's Opera"?
9. What is a "dubious"?
10. What is a "dubious"?

Answers to these questions will be found on second classified page.

## **To the Citizens of Edmonton:**

We regret the inconvenience caused to our consumers yesterday. The transmission and distribution systems of the Company are among the best in existence, and we believe our organization to be most efficient. For the last four years we have delivered gas from the Viking field without interruption. That an accident should have occurred at this season of the year is regretted, but it could not, we believe, have been foreseen or guarded against. Immediately on the accident being discovered, the radio, the telephone, the newspaper distribution system and every other method was brought into service by the Company to avert any possible difficulty. An investigation will be immediately held to determine what steps, if any, should be taken to obviate a recurrence.

We wish to thank our friends and consumers, for their consideration and sportsmanlike attitude. For their assistance in giving notice and warning and their efforts to prevent inconvenience, we wish to thank the Mayor and Commissioner of the City of Edmonton, the Edmonton Journal, the Edmonton Bulletin, the Journal Radio, the Government Telephones, the City Telephone Department, the Newsboys, Mr. John Michaels, the City Engineer, the Chief of Police, the Chief of the Fire Department, the Alberta Federation of Labor, the Coal Operators and Miners, University of Alberta Broadcasting Station, and the many others who, by their sympathy and co-operation, enabled a difficult situation to be solved with good nature and without undue inconvenience.

## Queen Mary's Doll: Submarine Disaster: Ice Locked Ships

THE LAST PRIVATE OF THE CRIMEA WAR laid to rest. The funeral of Richard Sheers, late of the 17th Lancers, believed to be the last surviving private who served in the Crimea, taking place from the Veterans' Association in Bedford Row, London.

HENRY POOLE, London-born sculptor, who has been elected to the British Royal Academy. He is the sculptor of a number of well-known memorials in Great Britain.

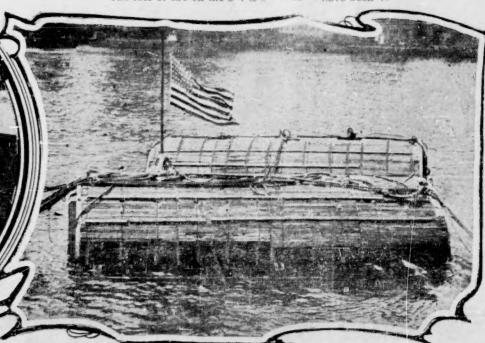

THE UNITED STATES COASTGUARD CUTTER C.G. 17, THE PAULDING, which rammed and sunk the submarine S-4, lying in Provincetown harbor after superficial repairs were made. The loss of life on the S-4 is believed to have been 40.

THE BEAUTIFUL doll-effigy of the Princess Elizabeth, which Queen Mary carried in the procession at a recent doll ball in London.

RIGHT: COLUMNA's illustrated book of the 15th century, sold from Sir George Holford's library, London, the winning bid, \$15,000, being telephoned across the Atlantic by a Philadelphia buyer.

£10,000 FOR TOC H. In response to the appeal of the Prince of Wales for £250,000 for Toc H, Sir Charles Hyde forwarded a cheque for the equivalent of \$48,000, the largest single gift to the fund.

AN EARLY MORNING CALL in Jasper National Park. All that is needed to awaken the friendship of the animals with man are a few tasty morsels.

WITH HIS USUAL EFFICIENCY, Santa has here descended the chimney, distributed his largesse, and departed again without so much as leaving a fingerprint behind him. Did he do the same at your house?

THE BALTIMORE as a ball-room dance is growing in favor because its steps take very little room. It is called "the essence of gracefulness, easy to learn and pleasing to watch."

EXPLORER'S SPOILS: Dr. Ralph Lanyon of the Field Museum of Chicago with a group of wooden figures from the tombs of unknown Madagascar, where he headed the museum's expedition.

TWO OF THE 40-TON PONTOONS used by the United States navy in its work of raising the ill-fated submarine S-4, which was sunk with all hands aboard off Provincetown, Mass.

WILL CANADA GET IT? The Clean Play trophy presented to the National Hockey League of the United States and Canada by Edward C. Fogg, manager of the Hotel Roosevelt, New York. Mr. Fogg, at the left, and Tex Rickard look it over.

ARCHITECTS DO NOT often have the luck to be called upon to design a palace for a real king. J. M. Wilson, A.R.I.B.A., is at work on one for King Feisal of Iraq to cost \$250,000.

SAVING A VANISHING SPECIES: Some of the young of Canada's national antelope heard in Nemiskam National Park. This species was practically extinct when, in 1915, fifty were procured and placed in the park. They have become tame and are prospering.

ICE JAM HOLDS LAKE VESSELS: Over a score of vessels have been caught by the ice jams in various parts of the lake. Those above are trying to work their way out of Hay lake in the vicinity of the Michigan Soo.

THE LITTLE TOWN OF BETHLEHEM as it is to-day: The terraced hills still flourish with fig and olive trees, but the buildings have taken on a modern touch.
